Alliance Construction Breaks Ground on Two Projects

Alliance Construction Solutions has broken ground on two Colorado Front Range projects, according to Brian Weinmaster, Alliance executive vice president.

Morgan Community College selected Alliance for expansion and remodel of Spruce Hall that houses the college's nursing, science and health technology programs. According to Weinmaster, the single-story, nearly 14,000 square-foot addition to Spruce Hall will include nursing, simulation and science labs, study areas, offices and a commons area. An additional 7,500 square feet of existing space will be renovated to house physical therapy and emergency medical services programs.

Metro Wastewater Reclamation District in Denver awarded Alliance a contract for plant upgrades and construction of new facilities. Project duration is 12 months and in addition to new construction includes demolition and excavation work.

"These diverse projects illustrate Alliance Construction's ability to serve a variety of owners seeking quality commercial construction services," said Weinmaster.

Alliance Construction Solutions is a full-service general contractor with offices in Loveland, Denver and Cheyenne.
