**Alliance Construction Project Receives LEED Gold Certification
*US Green Building Council awards certification***

Nederland Community Center has been awarded the LEED® Gold Certification. Alliance Construction Solutions designed and built the center in conjunction with Architecture West LLC.

According to Alliance Construction Solutions President Bill Joyner, the Nederland Community Center is among a handful of Colorado projects to be awarded LEED Gold certification. Only Platinum certification exceeds LEED Gold.

"We are very proud the Nederland Community Center received LEED Gold certification," said Joyner. He added the multi-million dollar contract specifications required a LEED-certified building; however, LEED Gold certification required additional effort from Alliance and project partners.

Rick Fedrizzi, president, CEO and founding chair of the U.S. Green Building Council agreed.

"Alliance Construction Solutions's LEED Gold certification demonstrates tremendous green building leadership," said Fedrizzi. "The urgency of USGBC's mission has challenged the industry, and Alliance Construction Solutions serves as a prime example of how much we can accomplish."

The 27,000 square-foot building in Nederland included a gym, classrooms and other useable space for the community.

A dedication and LEED awards ceremony for the Nederland Community Center, 750 Hwy 72 North, is scheduled for 2 pm Friday, December 4.

Representatives from the Colorado governor's office and USGBC will attend. The ceremony is open to the public.

Alliance Construction Solutions is a full-service general contractor with offices in Denver, Loveland and Cheyenne.
